DETAILED ACTION

1. This Office Action is in response to the Applicant's Amendment filed on April 6, 2009.
2. Claims 1, 10, 14, 17, 21, 30, 34, 37, 41, 50, 54 and 57 have been amended.
3. Claims 8-9, 11, 28-29, 31, 48-49, 51 and 61-62 have been cancelled.
4. New claim 65 has been added.
5. Claims 1-7, 10, 12-27, 30, 32-47, 50, 52-60 and 63-65 are pending.

Allowable Subject Matter

6. Claims 1-7, 10, 12-27, 30, 32-47, 50, 52-60 and 63-65 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art on record:

Tso et al. (US 6,088,803) teaches a virus checker may be implemented as a software module installed on network device or on a separate device coupled to network device. Virus checking is implemented in a manner intended to maximize efficient transfer of data from server to client device. Content server will transmit a requested data object as a series of contiguous portions. Virus checker performs virus checking on the requested file as portions are received from content server. (col.2, line 38-col. 3, line 54) Tso further teaches retrieving a data object to be downloaded to the client, scanning the data object for a computer virus and downloading the data object to the client if no computer virus is detected, wherein the data object is segmented into a

series of contiguous portions, retrieving, scanning and downloading steps being performed for each of said contiguous portions. (col. 5, lines 27-42; col. 9, lines 1-8)

Fielding et al. "Hypertext Transfer Protocol -- HTTP/1.1", RFC, June 1999, teaches an application-level protocol wherein if a client has a partial copy of an entity in its cache, and wishes to have an up-to-date copy of the entire entity in its cache, it could use the Range request-header with a conditional GET (using either or both of If-Unmodified-Since and If-Match.) However, if the condition fails because the entity has been modified, the client would then have to make a second request to obtain the entire current entity-body. The If-Range header allows a client to "short-circuit" the second request. Informally, its meaning is "if the entity is unchanged, send me the part(s) that I am missing; otherwise, send me the entire new entity. (page 80; 14.24 and 14.25; page 82, If-Range)

7. With respect to the Independent claims 1, 21 and 41:

The prior art on record either taken singularly or in combination fail to teach ***"receiving a request from the computer malware scanning software for data comprising a randomly accessed portion of the requested file selected in a random order by the computer malware scanning software from among portions of the requested file and based on a portion of the requested file to be scanned by the computer malware scanning software, wherein the randomly accessed portion of the requested file is requested utilizing a byte range technique; in response to a determination that the requested portion of the requested file cannot be transferred, transferring an entirety of the requested file and supplying***

the requested data to the computer malware scanning software to fulfill the request for data comprising a portion of the requested file, wherein it is determined that the requested portion of the requested file cannot be transferred if the requested portion of the requested file cannot be randomly accessed; tracking information associated with each transfer of a requested portion of the requested file; and wherein the byte range technique turns a serial download mechanism into a random access file mechanism; wherein the data associated with the request from the computer malware scanning software comprises a plurality of randomly accessed portions of the requested file” including all the other limitations recited in the independent claims.

8. Dependent claims 2-7, 10, 12-20, 22-27, 30, 32-40, 42-47, 50, 52-60 and 63-65 are also allowed for incorporating the allowable feature set forth above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
